Kalimati, Kathmandu

ABOUT ME

I'm a cybersecurity professional with practical experience in application security as an F5 BIG-IP administrator, focusing on managing and securing applications. I'm now seeking opportunities to further enhance my skills and contribute to impactful cybersecurity initiatives.

SOFT SKILLS

- Collaboration
- Adaptability
- Communication

TECHINICAL SKILLS

Cybersecurity & Offensive Security
- Understanding of OWASP Top 10 vulnerabilities (e.g., XSS, SQLi, CSRF) and their mitigations
- Practical experience with security tools like Burp Suite, Nmap, Metasploit, Nikto
- Knowledge of vulnerability assessment, basic exploit techniques, and threat detection

Network Analysis & Security
- Performed packet capture and analysis using Wireshark and tcpdump
- Solid grasp of networking protocols: TCP/IP, DNS, NAT, VLANs, SSL/TLS
- Configured routers, firewalls, and load balancers for secure network environments

Application Security & F5 BIG-IP
- Configured F5 BIG-IP (LTM, ASM) for secure application delivery and traffic control
- Created and optimized virtual servers, pools, SSL profiles, and iRules
- Tuned WAF policies and analyzed logs for performance and threat visibility

Scripting & Automation
- Wrote basic automation scripts in Python and Bash for task simplification and automation workflows
- Basic knowledge of JavaScript, particularly in the context of web application behavior

EDUCATION

2081
Bachelors in Computer Science and Information Technology
Nepalaya HSS & College

2076
Higher Secondary Education
Gyankunj SS & College

2073
Secondary Education
Model School Thankot

CERTIFICATIONS

Google Cybersecurity Certificate - Coursera

Application Delivery Fundamentals - F5 101

TECHNICAL SKILLS

Infrastructure & Virtualization
- Worked with Docker and Kubernetes for containerization and service orchestration
- Used Git/GitHub for version control and collaboration
- Experience with both Type 1 and Type 2 hypervisors
- Familiar with hosting and reverse proxy setup using NGINX

SIEM & Monitoring
- Deployed ELK Stack in lab environments for log collection and visualization
- Understanding of SIEM concepts: event correlation, alerting, and threat detection

Operating Systems & Platforms
- Command-line system administration knowledge with RHEL, Debian-based, and Arch Linux systems
- Experience with Windows system administration and user/resource management
- Familiar with Windows Subsystem for Linux (WSL) for hybrid development and testing

DNS & Web Infrastructure
- Configured BIND DNS servers and zone files for internal resolution and lab environments
- Experience with F5 DNS (GTM), GSLB, and DNSSEC implementation and validation

HOBBIES

Graphics Design	Football
Music	Knowledge Sharing

Application Security Engineer
Digital Network Solutions / NagPokhari, Kathmandu
- Configuring and managing F5 BIG-IP WAF for application delivery and security.
- Monitoring traffic and mitigating threats with WAF policies.
- Updating and troubleshooting WAF configurations for optimal security.

Security Research Analyst
SecurityPal Inc.. / Baluwatar, Kathmandu
- Enhance the client's knowledge repository
- Respond to prospect's security questionnaires

Technical Helpdesk
Subisu Cablenet Ltd. / Baluwatar, Kathmandu
- Assisting with Network Setup and Issues
- Conducting Remote Diagnostics, Support and Configurations
